Weather and chance of precipitation at 600m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Cloudy	Cloudy	Light rain	Heavy Rain	Heavy Rain	Mist
Precipitation probability					
<05%	10%	30%	60%	80%	40%

Forecast for Wednesday 19 Aug 2020

Weather: A fine, dry start with some mist possible in the valleys. Staying dry for much of the day, although cloud thickening from late morning onward, and descending onto tops through the afternoon. Outbreaks of heavy rain are then expected to spread by early evening, along with strengthening winds. Rain perhaps easing a little by midnight.

Chance of cloud free mountain/hill tops above 600m: 90% until mid-afternoon, then falling to 60% with cloud developing above 500m. Becoming 30% around dusk with cloud thickening further.

Visibility: Some good views possible through the morning, but rather hazy. Also becoming limited with increasing amounts of low cloud and rain later. Visibility becoming very poor on the obscured tops.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite a fine morning, conditions will deteriorate through the afternoon, with a strengthening breeze, along with some persistent and occasionally heavy rain. This leading a poor end to the day.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Wed 19 Aug 2020	10mm	21.8mm	25.4mm

Forecast for Thursday 20 Aug 2020

Weather: Blustery band of rain during the early hours, will quickly clear. A windy, but generally fine and dry day follows. Feeling warm with some long sunny spells, and just the outside chance of a brief shower. Winds strengthening further during the evening, with band of heavy and squally showers moving east by midnight.

Maximum wind: Southerly 20-25mph with 30-40mph gusts, perhaps briefly 50mph with squally bands of rain.

Chance of cloud free mountain/hill tops above 600m: 20%, with widespread cloud at 500m until squally rain band clears early hours. Then near 100% with all cloud remaining above the hill tops.

Visibility: Poor overnight for a time, but wide ranging views expected through the day, with very good to excellent visibility developing.

Temperature: **Valleys:** Plus 10 Celsius becoming Plus 20 Celsius
At 600m: Plus 10 Celsius becoming Plus 15 Celsius
Freezing level: Above the summits.
